

NFT meets Reality

An NFT, Non-Fungible Token is a "cryptographic token" that represents a specific item, be it digital or physical, on a blockchain.

NFTs use blockchain technology (evidence-based operations) similar to that of cryptocurrencies and are mostly associated with the token ETH Ethereum.

In Arts from now on, the value of an exhibit can at least be "doubled".

value 1: The haptic art object = The Picture

Wert 2: The digital art object = der NFT

The collector can acquire a new work of art take a two-pronged approach and rapidly amortize his investment.

Example Two successful Project.

Nr. 1 = „**TIMELESS**“:

A rare item, not necessarily art, is divided into small acquirable shares.

Nr. 2 = „**SORARE**“: <https://sorare.com/>

a) Correlating real market value of the player with the value of the card and its rarity as well as the...

b) Current value of the ETH Ethereum token.
